GitHub 🖇 Portfolio

📇 Profile

I am Ifedayo Ijabadeniyi, a web-developer out of Lagos, Nigeria. I possess an obsession for helping bring products to life using elements of engineering and art that software development entails.

I focus on delivering high-quality software solutions, using clean code methods like TDD in agile environments. Big fan of Linux!

Coming from an engineering background, effective communication and focus on cost-efficient solutions are one my key skills.

Core Expertise
- Golang
- JavaScript
- React
- PostgreSQL
- MongoDB
- NodeJS
- Docker
- TypeScript

I have worked with the popular Express framework for NodeJS, along with cutting-edge front-end technologies like GraphQL, GatsbyJS, and NextJS. I enjoy using TypeScript for type safety, and I'm always keeping an eye out for better tools to help deliver increasingly excellent products.

Currently interning as a NodeJS Engineer at Zuri 🖇

💼 Professional Experience

Mar 2021 – Jul 2021	**Intern,** *Zuri Training* 🖇
Lagos, Nigeria	I underwent rigorous training meant to simulate the demanding nature of the real world development space, under the tutelage of world class engineers, designers and career advisors. I gained immeasurable experience and technical ability as a software developer, and am now aware of the value I bring to any forward-thinking and ceiling-shattering team.
Jun 2019 – Dec 2019	**Mechanical Engineering Intern,** *CORMART Nigeria*
Lagos, Nigeria	I interned as a mechanical engineer under incredible mentors and industry-leading professionals at the CORMART house, Lagos, Nigeria. I gained my first experience of the demands of a professional workplace and the kind of work ethic, and constant self-motivated improvements/growth that accelerates growth both as an individual and as a professional.

✒️ Interests

Reading
I am particularly interested in biographies, and historical figures and events.

Coding
I believe free time should be a balance of passive productivity and fun; coding is my Mt Everest.

Fitness
Besides my passion for coding, I have a love for fitness. I preach about it a lot and I believe that (especially) developers, should be more conscious about the long-term positive effects of staying active.

🧠 Hard Skills

Python development
Web development and API architecture using the flask framework.
Desktop app development using Tkinter.

Backend development
- API architecture and consumption using the NodeJs environment and associated framework and libraries.

Database management
Mastery over relational and document oriented databases using PostgreSQL and MongoDB

Frontend Development
- Mastery over web fundamentals of HTML, CSS, and JavaScript.
- Building component based UI's using React.
- Writing modular CSS using SASS and styled components.
- Crafting advanced animations using GSAP.

🎓 Education

B.Sc. Surveying and Geoinformatics Engineering,
University of Lagos

2015 – present | Lagos, Nigeria

- Class Representative Surveying and Geoinformatics Engineering
- Co-captain Chess Club
- Captain football team
- I completed a Land Use project to develop a Land Information System (LIS) to allow users keep track of landed properties and generate interactive maps on each of those properties.

📖 Courses

JavaScript Algorithms and Data Structures,
FreeCodeCamp

Jan 2021 – Feb 2021

While HTML and CSS control the content and styling of a page, JavaScript is used to make it interactive. In the JavaScript Algorithm and Data Structures Certification, you'll learn the fundamentals of JavaScript including variables, arrays, objects, loops, and functions.

CS50's Introduction to Computer Science,
Harvard University

Mar 2020 – Nov 2020

An introduction to the intellectual enterprises of computer science and the art of programming.

The Complete 2021 Web Development Bootcamp,
Udemy

Apr 2020 – Jul 2020

Become a full-stack web developer with just one course. HTML, CSS, Javascript, Node, React, MongoDB and more!
